PUFF INK

A specialty screen print that expands with heat to create a raised, textured design that adds bold dimension and a soft, standout finish to your tee.

METALLIC INK

A specialty ink infused with jewel tone pigments that creates a reflective eye catching finish with a bold metallic shine.

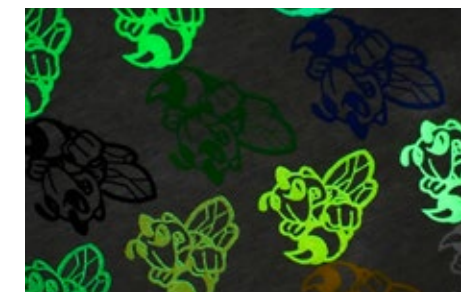

HIGH DENSITY

Through the use of a thicker ink and stencil we are able to create a raised 3D textured appearance while still maintaining crisp edges to achieve a look that puff cannot accomplish.

UV INK

A specialty ink that changes color when exposed to black light, revealing a bold effect. Can be used as a soft tonal look in normal conditions but give your logo that extra punch under the right conditions.

GLOW INK

A specialty screen print ink that absorbs light and glows in the dark, creating a bold, high-impact effect when the lights go down.

GLOSS CLEAR

Apply this special clear ink on top of a printed pantone to add depth and shine to your design.

BASED OUT

Through the use of a reducing agent mixed with plastisol ink we can achieve this based out look when you want a vintage washed out design but don't have 10 years of time to achieve it.

GRADIENT

A blended print technique that smoothly transitions colors for a soft fade and dynamic visual depth. Can be used to simulate extra Pantones when blended correctly.

FINE LINE

A detailed printing technique that captures thin lines and intricate artwork with sharp precision and clean clarity.

PREMIUM EMBROIDERY

STITCH WITH IMPACT

FLAT EMBROIDERY

Flat embroidery delivers clean, precise stitching with a smooth finish—ideal for detailed logos and professional decoration.
